Before you ship the site *Claude* built

Fifteen boring checks. Run them before you post the link, not after someone DMs you a screenshot.

CONTENT

- [ ] **No lorem ipsum left anywhere**
  Search the page for "lorem" and "placeholder".
- [ ] **Every button goes somewhere**
  Click each one. Twice.
- [ ] **Prices match the checkout**
  Compare the page, the checkout and any emails.
- [ ] **The contact email actually receives**
  Send yourself a test from a different address.

MOBILE

- [ ] **Checked at 375px wide**
  Open dev tools, pick a phone size, scroll every section.
- [ ] **Tap targets big enough for thumbs**
  Buttons and links you can hit without zooming.
- [ ] **No sideways scroll**
  If the page wobbles left and right, something is too wide.
- [ ] **Text readable without zooming**
  Body text, buttons and form labels.

TECHNICAL

- [ ] **Page title and description set**
  This is what shows in search and when shared.
- [ ] **Share image shows up in a DM**
  Paste the link to yourself and look.
- [ ] **Forms tested end to end**
  Submit it, then find the entry where it should land.
- [ ] **Analytics fires once, not twice**
  One visit should count as one visit.

THE HUMAN BIT

- [ ] **Open it on someone else's phone**
  Their screen, their browser, their signal.
- [ ] **Send it to one honest person**
  Ask what they thought the page wanted them to do.
- [ ] **Read the headline out loud**
  If you stumble, rewrite it.
