Get to the first *ask*

Do this before you build the next feature. If you're polishing the logo instead, that's the sign.

01 **One real person**

Name one actual person who has the problem. Not "founders". A name.

02 **Their problem, in their words**

Whatever they'd say out loud, not your product description.

03 **The ask**

Copy, edit, send. No pitch.

```
Hi [name], I'm working on [thing] to help [type of person]
with [problem]. Would you be open to a 10-minute chat about
how you handle it today? No pitch, I just want to learn.
```

04 **Send it to five people today**

Track what happens.

NAME	SENT	REPLIED	WHAT THEY SAID

05 **The sentence that surprised you**

After each conversation, write the one thing they said that you didn't expect.

No new feature until you've had a real conversation.
